Front-End Developer

I'm a proficient web developer with **1 year of experience** in **WordPress, HTML, CSS, JavaScript**. I know popular framework and libraries such as **React.js**. I deliver high quality, responsive web solutions efficiently and effectively.

Experience

Codenuts

Front-end Developer Internship: (Feb 2024 – June 2024)

- Create **responsive webpages** for web and mobile view web-apps.
- Create attractive **user interface** and optimized **user experience**.

Web Colonizer

WordPress Developer Internship: (July 2024 – Oct 2024)

- I have designed responsive websites by using **Elementor** and optimized e-commerce features by using **WooCommerce**.
- Enhanced design and functionality with custom styling and hard-coded pages.

Raised Lines Foundation

Web Developer Internship: (July 2024 – Oct 2024)

- Designing and implementing user-friendly web pages.
- Collaborating with the designing and backend teams to integrate front-end features.
- Troubleshooting and Debugging code to ensure a seamless user experience.
- Optimizing website performance for speed and scalability.

Projects

[Raised Lines Foundation](#)

[WordPress, Elementor, WooCommerce, C-panel](#)

- This is a Not for Profit (NPO) organization working for **Visually Impaired persons**.
- Developed a WordPress website with nearly 100% accessibility for visually impaired users
- Ensured seamless navigation and usability with **NVDA screen reader** support.

[Portfolio Website \(See the URL\)](#)

[HTML, CSS, JS, React.js](#)

- Creating a dynamic, responsive portfolio website by using **react components**.
- Implementing modular **CSS module** for better maintainability and performance.
